

Company & Capability Profile

Version v1.0 | 2026-07-24 | Public profile

Public summary for evaluation. It is not an executed agreement, a warranty, or a certification. Final scope, controls, residency, and terms are defined in your order form, data-processing agreement, and counsel-reviewed contract, which control over this document.

01

Who we are

Jueni Afrika Limited is a Nairobi business-intelligence company. We help African teams see what needs attention, give important work an owner, prepare the next move, and keep a reliable record after the day moves on.

02

What we build

One company, three practical ways to make business work easier:

- A governed workspace for the working day (Jueni Biashara AI) - money, stock, customers, documents, approvals, and management in one readable rhythm.
- A focused fix for one recurring job - collections, sales follow-through, stock, management reporting, content, research, or workflow design, before a wider rollout.
- A specialist department workbench - Finance, Sales, Operations, Research, Media, Service, Compliance, or Systems Integrity, with visible human authority.

03

The lab behind the products

Jueni AI is our research and development lab. It studies how work moves, builds the systems behind Jueni Biashara AI, evaluates each method, and establishes the controls before a product reaches customer work.

04

Our operating standard

Useful before impressive. We begin with operating reality, separate observation from inference, keep consequential authority human-owned, and retain source, action, decision, and exception evidence.

05

How we work with buyers

We start with one job worth getting right, prove it on real examples, and hand it back as a routine your team can run and check. One honest win first; anything wider comes after that works. Reach us at hello@jueniafrika.com.
