

Terms Summary

Version v0.2 | 2026-07-24 | Draft summary

Public summary for evaluation. It is not an executed agreement, a warranty, or a certification. Final scope, controls, residency, and terms are defined in your order form, data-processing agreement, and counsel-reviewed contract, which control over this document.

01

Scope

This summary describes, in plain terms, the shape of a Jueni Biashara AI engagement. It is not the contract. Your executed order form and terms control over anything stated here.

02

Beta status

Jueni Biashara AI is in beta. Features, controls, and documentation evolve, and availability or behaviour may change. We label what is live versus planned rather than imply a finished guarantee.

03

What you get

Access to the workspace, focused service, or department scope described in your order form, at the tier and limits agreed, with the support level stated in your contract.

04

What you are responsible for

Configuring least-privilege access, reviewing prepared work before it takes effect, keeping your credentials safe, and ensuring your use complies with applicable law. Authorised people approve money, tax, contracts, staff decisions, and outbound messages.

05

AI outputs and human review

Prepared drafts, checks, and summaries support your team; they are not legal, tax, or financial advice, and consequential actions require human approval. You are never asked to trust a result you cannot check.

06

Fees, currency, and data

Public list prices are in Kenyan Shillings; VAT may apply per Kenyan rules, and your quote or checkout shows the final breakdown. Data ownership, confidentiality, residency, and export are set out in your agreement.

07

Boundary

This summary does not create rights or obligations. Only the executed agreement does. Reach us at hello@jueniafrika.com for a scoped discussion.
